

### Company Overview

CP<sup>2</sup> Energy Corporation is a manufacturer and supplier of alternative energy components and systems for agricultural, industrial, government and consumer markets. Located in Colorado's San Luis Valley, the company is engaged in product development and light manufacturing. Established in 2007, the company provides high quality, specialized components and systems to regional and national clients.

Our specialty is custom engineered modular solar energy based products, intelligent system components and application specific OEM solutions for energy capture, management and distribution. We are also a local dealer for alternative energy component distributors.

### SBA Small Business

CP<sup>2</sup> Energy Corporation is a small business supplier for those contracting officers and purchasing agents needing to meet regulatory obligations of procuring products and services from small businesses.

### Products and Services
